

LED DOWN LIGHT

CL113

Introduction

◀ CL113 is a recessed commercial down light which can achieve modular splicing, It adopts brand COB chip and high reflective rate reflector ; ADC12 Aluminum heat sink with multiple layers provides excellent thermal management; the module can be adjusted from any directions to 30 degrees, practical for accent lighting and decorative lighting.

Features

1. Modular splicing.
2. Triac dimming, 0-10V dim, DALI dim both available.
3. Reflector beam angle changeable.
4. Module lighting directions adjusted to 30 degrees in any orientations.
5. Choice of 2700K, 3000K, 4000K, 5000K CCT.
6. Lifetime exceeds 50,000 hrs.

Application Areas

It is designed for general lighting applications in office, supermarket, shop, school, hotel, etc. It is also widely used for public areas, such as stairway, lobby, reception, corridors etc.

Installation Procedure

WARNING

1. Switch off before installation.
2. Switch on only after complete installation and examination of the circuit.
3. Professional electrician for installation and maintenance only.

Turn Off power supply before starting any installation. Read instructions & check you have all the tools & accessories to complete the installation correctly.

■ Surface Mounted Installation Only

Step 1

Make a proper cutout(150*150mm~160*160mm) on the ceiling.

Step 2

Connect the wires correspondingly.

Step 3

Connect the terminals between driver and lamp, insert the lamp into the ceiling.

Step 4

Make sure the clips match well with the ceiling, installation complete.

Splicing in rectangle

Connect the module by connection clips and fix them by screws.

The next three, four....heads can be done in the same way.

Splicing in square

Remove one of the clips on each module.

Connect the module by connection clips and fix them by screws.

Fix the two sets modules into a square one by connection clips.
